

Business Name: FiberLink Consultancy

Mission: To accelerate Lebanon's digital transformation by ensuring world-class fiber optic infrastructure through expert supervision, planning, and technical consultation.

About Us:

FiberLink Consultancy is a Lebanese engineering consultancy that provides end-to-end supervision and technical guidance for fiber optic installation projects across Lebanon. We work alongside contractors and government stakeholders to ensure the deployment of reliable, high-speed fiber networks that meet international standards.

Our role includes overseeing installation quality, designing efficient network plans, managing field teams, coordinating with contractors, and providing technical advice on civil, electrical, and telecom aspects of fiber deployment.

Services:

- Supervision of fiber optic installation projects
- Network design and quality control
- Technical consultation and field support
- Project management and reporting
- Civil and telecom site surveys
- Documentation and compliance verification

Our Team:

- **Aline Hassan – Chief Executive Officer (CEO):** Founder of FiberLink Consultancy, responsible for strategic leadership, business partnerships, and ensuring that all projects align with our mission to modernize Lebanon's fiber infrastructure.
- **Diana Hassan – Project Manager:** Coordinates between clients, contractors, and engineers to keep all operations running smoothly. She specializes in telecom project scheduling and stakeholder communication.
- **Mohammad Hassan – Senior Project Manager:** Oversees field operations and quality control. With extensive experience in civil and telecom engineering, he ensures all fiber installations comply with international standards.
- **Aya Malak – Telecom Engineer:** Focuses on fiber design, splicing plans, and testing supervision. Works closely with contractors to validate technical specifications.
- **Rayan Saad – Civil Engineer:** Manages site preparation, trenching supervision, and infrastructure compliance. Ensures that all civil works support efficient fiber rollout.
- **Taha Hassan – Surveying Engineer:** Conducts detailed field surveys and mapping to support design accuracy and installation safety.
- **Mostafa Merhi – Network Engineer:** Provides technical consultation for network configuration, signal testing, and integration support.

- **Lynn Hachem – Quality and Documentation Specialist:** Handles documentation, progress reporting, and compliance tracking to ensure transparent communication with clients.

Why Choose FiberLink Consultancy:

Our deep understanding of Lebanon's infrastructure landscape, combined with technical expertise and strong field experience, enables us to bridge the gap between contractors, service providers, and end users. We prioritize precision, transparency, and sustainability in every project we supervise.

Vision:

To become the leading consultancy in Lebanon driving the expansion of fiber optic networks across the Middle East.
